INTRODUCTION

Atrocity Analytics is a new product we have launched to help understand the extent, nature, and evolution of hate speech in various atrocity literature since the colonial era. We have repurposed our AI Model to cover atrocity literature. This report is the first Atrocity Analytics report we are publishing, and it provides insights into James Mill's History of British India, a valuable resource for understanding the roots of anti-Hindu hate that prevails today. We hope you find this report informative.

CONCLUSION

Thanks for reading this report. We hope you find this informative. Our goal is to create more such reports from select atrocity literature to gain an analytic understanding of anti-Hindu hate from the British colonial era.

While the metrics produced in this report are not comprehensive, they can be analyzed together to develop a better understanding of the nature and prevalence of anti-Hindu hate. As more reports are produced, we are hoping to gain insights that would otherwise be hidden. This information may be used to raise awareness of the problem of anti-Hindu hate speech, to develop strategies to combat it, and to inform public policy and education initiatives.

Anti-Hindu hate can take many forms, including violence, discrimination, and misinformation. It is important to be aware of the different ways in which anti-Hindu hate can manifest itself, and to speak out against it whenever we see it. By learning more about anti-Hindu hate and supporting organizations that are working to combat it, we can create a safer world for all Hindus.
