# About This Report

---

This report documents 209 verified incidents of fatal violence against Hindu victims in India between January 2025 and December 2025. Each entry is sourced from open-source intelligence, news reports, and ground-level journalism, with direct links provided for independent verification.

Cases have been filtered to include only those where the perpetrator is identified - by name, organisational affiliation, or documented communal context. Incidents arising from political rivalries without a communal dimension, accidents, and events outside India have been excluded to maintain analytical focus.

This document is intended for researchers, journalists, human-rights organisations, and policy analysts. It presents documented facts with verifiable sources so that the scale and pattern of targeted violence can be studied and addressed.
